

Recipient: RI Council on Elementary and Secondary Education and Ken Wagner

Letter: Greetings,

It is important to me that kids have an opportunity for free play time every single day. Research has shown that kids learn better and can self regulate better when given plenty of 'down time' throughout the day.

While I recognize the focus right now is on increasing the rigor and standards our kids must meet, it is equally important that we recognize that children need to play and that shorter and shorter recess times do not support the outcomes sought by increasing standards.

I understand that you are now considering your regulations for how long the school day will be, and that those regulations include 5.5 hours of instructional time.

You have an opportunity to protect recess and show that you see this as important to our youngest students by adding a provision to your guidelines for the school day to also include at least 30 minutes of recess. I hope that you will do that before finalizing the guidelines.
